FIRE SAFETY AWARENESS

Introduction

The risk of fire and the resulting threat to human life and continuity of operations is an ever present danger to organisations of every size. So are your organisation's building, premises and facilities compliant with current fire safety laws with all employees understanding what is required of them.

Do your employees know what fire precautions they should take. Do they know what to do on discovering a fire. Do they know what to do in the event of an emergency and how to evacuate your building, premises or facility safely.

If you answered 'no' to any of the above then your organisation may be in breach of the Regulatory Reform (Fire Safety) Order and could be prosecuted or fined or served a notice or be exposed to significant legal claims. The provision of training is not a matter of choice or optional, it is an absolute legal requirement for your organisation.

Aims of the course

Fire Safety Awareness from Praxis42 aims to change the way that your organisation thinks about fire safety. It's designed to promote a culture within your business that encourages everyone to focus on fire prevention and the correct action to take in the event of a fire.

Who is it for?

The course is aimed at all levels of employees or those who occupy or work in your organisation's buildings, premises or facilities. Developed by qualified and experienced health, safety and fire professionals with many years experience in the delivery of training solutions.

The result is a high quality training solution that gives the trainee the necessary tools to meet their health, safety and environment obligations and the organisation a level of compliance through an engaging and effective learning medium.

How is it delivered?

Fire Safety Awareness elearning can be delivered online or through a computer network to each trainee at their desktop, laptop or mobile device. We can also provide the course to be integrated into a SCORM compliant LMS. The training can be completed at the employee's own pace by "book marking" and recording progress and returning to the

training at a later time. In deliverin g the training in this way, the normal cost of training are reduced, whilst still achiev ing the desired awareness an d compliance with the organisation's legal responsibilities . At the end of the training the trainee will complete an assessment.

Compliance record keeping instantly solved

An invaluable feature of our elearning courses is our learning management system (LMS) called SHINE. This solves the problem of complianc e record keeping by recording completion of courses and making them available for you to view and manage electronically. No more struggling to find training records should you have a visit from the enforcing agency or an audit.
