

# SpanSet®

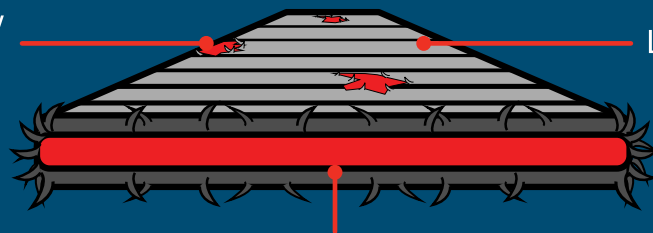

Height Safety  
Lifting  
Load Control  
Safety Management  
iWeb™

## iWeb™ is SpanSet's patented inspection-ready webbing.

To inspect your harness, simply look for visible red yarn that clearly marks cuts and abrasions. If the inner red core is visible upon inspection, then the harness must be removed from service.

iWeb™ allows the end user to constantly monitor the condition of their own harness, although it must still be checked by a competent person on a 6 monthly basis, in accordance with AS/NZS 1891.4.

Visible inner red core clearly shows cuts and abrasions

Load bearing silver outer case

Load bearing indicator red core

## iWeb™ is available now in SpanSet's premium iPlus harness range:
