

STINGER SPIKE SYSTEM

3000 SERIES

STINGER 3000 SERIES

The Stinger 3000 is a compact, lightweight, easy-to-use tyre deflating device that is extremely effective in stopping pursuits involving large vehicles including large trucks, buses, coaches, farm and military type vehicles.

Sturdy, Reusable System:

The Stinger 3000 consists of a reusable modular base with moulded sections of Dupont Zytel® and Flexible Nylon® connected with stainless steel base is designed to last for numerous pursuits and has withstood impacts in excess of 130 MPH. If damaged, individual sections are easily replaceable.

Superior Spike Penetration

Stinger spikes are hollow. This allows air to escape at a controlled rate without causing a blowout or sudden loss of control.

The spikes are 53mm long and are made of 304-T7 stainless steel. The 3000 series new 53mm length spike acts in conjunction with our patented rock-and-tilt mechanism base. This Stinger technology effectively penetrates thicker

tyres to safely and quickly end pursuits involving many larger vehicles including large trucks, buses, coaches, farm and military type vehicles.

Other Features

The 3000 series comes in two sizes 15 1/2 ft and 25ft length which can cover multiple traffic lanes and are furnished with replacement spikes, tip guards, compression sleeves, spike replacement tool, safety glasses and training manual in a compact, quick deployment carrying case. Additional stinger replacement spikes are issued free of charge on receipt of a completed Stinger Deployment Form. For incredible pursuit stopping power select the NEW 3000 SERIES.

Ref Order Code	Length	Weight (incl case)	Case Size
3015	15 1/2ft Length (4.72m)	15lbs 6.8kg	20 x 18 x 3 1/4 inches (50 x 45 x 8cm)
3025	25ft Length (7.62m)	21lbs 9.5kg	25 x 21 x 3 inches (62 x 53 x 7cm)

SpanSet UK Limited

**Height Safety
Lifting
Load Control
Safety Management**

SpanSet Limited has been established in the UK for over 40 years and is part of the SpanSet International Group of Companies sited across the world. The SpanSet brand is recognised globally as one of quality and reliability. SpanSet Limited design, manufacture and supply Height Safety, Lifting and Load Control products at their custom built Cheshire plant.

Training

Based upon our commitment to quality it is SpanSet's aim to provide training and support for their extensive product range and techniques. SpanSet's training courses provide the client with knowledge of equipment and techniques allowing them to operate safely in designated environments.

Training Courses

- Height Safety for Industry
- Height Safety for Police, Emergency Services & Military
- Working at Height on Vehicles
- Safe Lifting & Rigging
- Load Control

Height Safety

SpanSet's vast experience in webbing based products provided the perfect background for the development of the innovative range of height safety equipment including the patented Horizontal Safety Line and the Gotcha Range of Rescue Equipment.

Safeline Systems

SpanSet Safeline design, manufacture and supply a range of permanent Horizontal Life Lines when you combine these with SpanSet UK's range of height safety equipment you then have the total solution for your workers at height.

Safeline the total solution from survey – quoting – supply – installation – periodic testing & maintenance.

Lifting Slings

SpanSet's Lifting products include the patented roundsling in the 1970's to the new generation Supra Plus round slings, the Joker Hook and also the High Capacity 100 tonne MagnumPlus roundslings. All aimed at improving safety in your industry and work place. Our products find themselves being used in the most brutal environments and the SpanSet Brand continues to be specified by industry and defence forces around the world.

Load Control

Whatever the situation, whatever the load, whether lifting or lashing it is vital to know you are in control. That's why it's crucial to insist on SpanSet.

The SpanSet name has fast become the acknowledged industry term for industrial load control systems, only genuine SpanSet products offer the benefit of over forty years' development expertise – stretching textile technology to new limits.

SpanSet manufacture a comprehensive range of systems for securing your load - Commercial Vehicles lashings, Heavy plant equipment, vehicle recovery systems and light industrial restraints.

In short, on land, at sea or in the air, it pays to rely on SpanSet.
